SOLABIA COMPLETES THE ACQUISITION OF MIBELLE BIOCHEMISTRY, STRENGTHENING ITS POSITION IN SCIENCE-BACKED INGREDIENTS FOR BEAUTY AND WELLBEING

Solabia Group today announced the completion of its acquisition of Mibelle Biochemistry, the Swiss specialist in science-backed active ingredients for the cosmetics and nutraceutical industries, from Persán, under the terms announced on 19 February 2026.

This closing marks an important step in Solabia's growth strategy, strengthening its position as a global leader in biotechnology-driven, natural and high-performance active ingredients. By combining Solabia's international footprint and industrial expertise with Mibelle Biochemistry's recognized innovation capabilities, the Group will further expand its portfolio and accelerate the development of differentiated solutions for beauty and wellbeing markets.

Founded in Switzerland in 1991, Mibelle Biochemistry is known worldwide for its pioneering work in plant stem cell technology and modern biotechnology, with a portfolio covering skin beauty, healthy aging, hair care and cognitive support. Its actives are distributed in more than 50 countries.

Jean-Baptiste Dellon, Chief Executive Officer of Solabia, commented: *"The completion of this acquisition opens a new chapter for Solabia and Mibelle Biochemistry. Our teams share the same commitment to scientific excellence, sustainable innovation and customer proximity. Together, we are now even better positioned to support our customers with a broader, stronger and highly complementary range of ingredients"*

Cornelia Schürch, Head of Mibelle Biochemistry, added: *"Joining Solabia gives Mibelle Biochemistry the opportunity to build on its strong scientific heritage while opening new perspectives for international development. We are excited to combine our expertise with Solabia's capabilities and to continue delivering innovative, high-quality ingredients to our customers worldwide"*
